the determination of stages in the historical development of the germanic languages by morphological criteria In developmental psychology and moral, political, and bioethical philosophy, autonomy is the capacity to make an informed, uncoerced decision. Autonomous organizations or institutions are independent or self-governing. Autonomy can also be defined from a human resources perspective, where it denotes a (relatively high) level of discretion granted to an employee in his or her work.

Autonomy - Wikipedia

the determination of stages in the historical development of the germanic languages by morphological criteria 1. Introduction. Phthalates are amongst the more common organic contaminants in both the environment and consumer products. They are used as plasticizers, particularly the orthophthalates, in many plastics applications including packaging and other food-contact materials, such as tubing and equipment parts used in food processing, handling and storage.

the determination of stages in the historical development of the germanic languages by morphological criteria Abstract. Germ cells produce sperm and eggs for reproduction and

fertility. The Asian seabass (*Lateolabrax niloticus*), a protandrous marine fish, undergoes male-female sex reversal and thus offers an excellent model to study the role of germ cells in sex differentiation and sex reversal. Here we report the cloning and expression of vasa as a first germ cell marker in this organism.
