the developing visual brain The brain is an organ that serves as the center of the nervous system in all vertebrate and most invertebrate animals. The brain is located in the head, usually close to the sensory organs for senses such as vision. The brain is the most complex organ in a vertebrate's body. In a human, the cerebral cortex contains approximately 14-16 billion neurons, and the estimated number of neurons in ...

the developing visual brain 1. Introduction: The brain and food. It was Apicius, the 1st Century Roman gourmand (see Apicius, 1936), who purportedly coined the phrase "We eat first with our eyes" (Delwiche, 2012). Nowadays, a growing body of evidence from the cognitive neurosciences is revealing just how true this aphorism really is (e.g., see Van der Laan, De Ridder, Viergever, & Smeets, 2011, for a review).
