the development factory unlocking the potential of process innovation A SIM lock, simlock, network lock, carrier lock or (master) subsidy lock is a technical restriction built into GSM and CDMA mobile phones by mobile phone manufacturers for use by service providers to restrict the use of these phones to specific countries and/or networks. This is in contrast to a phone (retrospectively called SIM-free or unlocked) that does not impose any SIM restrictions.

the development factory unlocking the potential of process innovation 2.1. Product, service and system design. Designing for a CE requires a monumental shift in the way that organisations, designers and entrepreneurs develop, exploit and obtain value from products (Charnley et al., 2011, Bakker et al., 2014). There is an urgent need not only to address production processes, products and the provision of services, but to also redesign the patterns of consumption ...
