the development of language pdf

the development of language processing strategies a cross linguistic study between
japanese and english Language development is a process starting early in human life.
Infants start without knowing a language, yet by 10 months, babies can distinguish
speech sounds and engage in babbling. Some research has shown that the earliest learning
begins in utero when the fetus starts to recognize the sounds and speech patterns of its
mother's voice and differentiate them from other sounds after birth.
