the development of personality A personality test is a method of assessing human personality constructs. Most personality assessment instruments (despite being loosely referred to as "personality tests") are in fact introspective (i.e., subjective) self-report questionnaire (Q-data, in terms of LOTS data) measures or reports from life records (L-data) such as rating scales. Attempts to construct actual performance tests of ...

the development of personality Freud believed that life was built round tension and pleasure. Freud also believed that all tension was due to the build-up of libido (sexual energy) and that all pleasure came from its discharge.. In describing human personality development as psychosexual Freud meant to convey that what develops is the way in which sexual energy accumulates and is discharged as we mature biologically.
